### **REASONS FOR ALLOWANCE**

Claims 1-19 are allowed.

The following is an examiner's statement of reasons for allowance:

Per independent claims 1, 18, and 19, the prior art does not teach or reasonably suggest in combination the vehicle tracking system and method including a vehicle tracking processing section for determining a position and an enlargement/reduction ratio for a portion of a second input image that provides a maximum correlation value between the portion of the second input image and a reference template with respect to a remote vehicle, while enlarging or reducing the portion of the second input image in consideration of a change in size of the remote vehicle in the second input image, a processing result outputting section for determining a position of the remote vehicle relative to the vehicle based on the position and the enlargement/reduction ratio of the portion of the second input image that provides the maximum correlation value, and a reference template updating section for normalizing the vehicle image and the reference template, calculating a dispersion of at least one pixel of the reference template with respect to a pixel at a corresponding position in the vehicle image, and updating the reference template by deleting at least one pixel when the dispersion of the pixel is equal to or greater than a threshold value as claimed.

Claims 2-17 serve to further define the invention of claim 1 over the prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

### ***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Saka et al. (US006590521B1) teaches an object recognition system. Takenaga et al. (US006191704B1) teaches a run environment recognizing apparatus. Maekawa (US005530771A) teaches an image tracking device and image tracking method. Karasudani (US005369590A) teaches an inter-vehicle distance detecting device. Irie (US005257022A) teaches a method and apparatus for following a vehicle. Le Parquier et al. (US005195144A) teaches a process and device for estimating the distance between a stationary object and a moving vehicle. Asayama (US005161632A) teaches a tracking control device for a vehicle.
